Level 3: Terms of Service Agreement

Research and answer the following questions by saving your work in a Word document as follows:
a)   Make sure your file name has a descriptive format such as
"Module D1 Level3 Answers.docx".
b)   Create a folder titled "Module D Answers" in your GitHub repository
c)   Upload your answer file to this folder in your repository
d)   Email Mr. Nestor (gregory.nestor@peelsb.com) to look at your repository when you are finished. (e.g. "Mr. Nestor please look at my Module D1 Level 3 answers.")

1.   Research about "Terms of Service Agreements" and identify at least 3 main features of a terms of service agreement.
 3 main features in a terms of service agreement are privacy policy, account termination, and accountability.

2.   Review the GitHub terms of service.
(https://help.github.com/articles/github-terms-of-service/)
a.   Are you permitted to use this software for this class? Copy and highlight the section that conforms this permission.
 Yes, we are permitted to use this software for class because we are not breaking any of the rules on the terms of service *("A human must create your account; you must be 13 or over; you must provide a valid email address; and you may not have more than one free account.")*
        By using this software I am giving Github permission to change my on-file credit card.
        We are only allowed to make one free account.

b.   What rights do you give up by using this software?
        By using this software I am giving Github permission to change my on-file credit card.

c.   What limitations do you have when using this software?
 We are only allowed to make one free account
3.   Research about "Privacy Policy Agreements" and identify at least 3 main features of a privacy policy.
 A privacy policy explains what information is collected by the website about the user. It also explains how they use the information and how they protect their users personal information.

4.   Review the GitHub privacy policy.
(https://help.github.com/articles/github-privacy-statement/)
a.   What information does GitHub collect and track?

1. Github collects and tracks web server logs and cookies. In addition, they collect browser type, language preference, referring site, additional websites requested, the date and time of each visitor request, and ip address.

b. How does GitHub share your information? Copy and highlight the section that talks about information sharing.

Github shares my information by sharing statistics about how users use Github (*"We do share certain aggregated, non-personally identifying information with others about how our users, collectively, use GitHub, or how our users respond to our other offerings, such as our conferences or events."*).

c. How does GitHub communicate with you?

    a. Github communicates with its users by email only if the user confirms that they are okay with it

5. Explain how a "Privacy Policy" is different from a "Terms of Service" agreement.

Privacy Policy is different than Terms of Service because a privacy policy is used when websites collect information from a user and is required by law. While a terms of service agreement is a set of requirements that a user has to follow in order to be able to use a website.
